parallelistix.github.io

I am a software engineer/researcher in the field of high performance computing. I have experience in the design, implementation, and optimization of parallel algorithms on CPUs (Cilk/OpenMP) and GPUs (CUDA) for several problems in computational algebra (primarily used in solving systems of polynomial equations and cryptography).

Interests

- Performance portability, optimizing compilers, and automatic parallelization.
- Design, implementation, and optimization of parallel algorithms for CPUs, GPUs, and accelerators.
- Computational number theory and parallel arbitrary-precision integer arithmetic.

Work Experience

2015-Present University of Western Ontario, Research assistant at Symbolic Computing Laboratory (ORCCA).

- In progress: Parallel arbitrary-precision integer arithmetic on GPUs (CUDA).
- In charge of developing and maintaining CUMODP (a CUDA library for modular arithmetic).
- Lead developer of KLARAPTOR (a tool for improving runtime of CUDA kernels).
- Parallel implementation of small prime field six-step FFT on CPUs (Cilk), integrated in BPAS library.
- Parallel implementation of big prime field FFT on CPUs (Cilk), integrated in BPAS library.
- Parallel implementation of big prime field FFT on GPUs (CUDA), integrated in CUMODP library.
- Parallel univariate division on GPUs (CUDA).

Education

2017-Present **Ph.D. candidate in Computer Science**, University of Western Ontario, Canada
Supervisor: Professor Marc Moreno Maza, focused on parallel arbitrary-precision integer arithmetic.
Expected to graduate in December 2020.

2015-2016 **M.Sc. in Computer Science**, University of Western Ontario, Canada
Thesis: "FFT over Prime Fields of Large Characteristic and Their Implementation on GPUs"

2010-2015 **B.Sc. in Computer (Software) Engineering**, Isfahan University of Technology, Iran

Skills

Programming	C, C++, CUDA, Cilk, OpenMP, PTX assembly, x86 Assembly, Python, bash
Libraries	LLVM, CUPTI, GMP, POSIX, NTL
Tools/DBMS	LaTeX, gdb, valgrind, perf, MySQL, Microsoft SQL Server, PostgreSQL
Familiar with	MATLAB, Maple, OpenGL, OpenCL, NumPy/SymPy
